MINING, BUSINESS AND STOCKS.

EXPECTS BIG RUSH CAMP OF JARBRIDGE

Machinery Has Been Ordered for First
Mill to be Erected in New District
—Many Going in Spring.

Many eyes are now turned towar Jarbridge, the new wold camp in northern Nevada, and many mining men ar anxiously awaiting the breaking up of winter so they may be among the for-tunate ones who reach there in the spring. That there will be a rush for Jarbridge is certian, the phenomenally rich rock discovered there last fall and the limited development work accom-plished since then seeming to justify

rich rock discovered there last fall and the limited development work accomplished since then seeming to justify a great influx.

A. T. Buyz, partner of Enoch Stewart of this city, has just returned from an extended overland trip through that country. Mr. Buys is an old California mining man of wide experience. He pronounces Jarbridge a coming Cripple Creek—the next great gold camp of the future. He says the ore around Jarbridge appears to be in place, and the country is highly mineralized, particularly the center of the district, a strotch of about four by 12 miles. The gold quartz runs from \$100 up to as high as \$10,000 to the ton. He says there is plenty of it showing values of \$40, \$50 and \$100 to the ton. Lots of the rock shows free gold sticking out of it. But the permanency of the camp is in its large bodies of milling ore.

One of the largest companies now operating there has ordered machinery for a mill and will rush the material in the first thing in the spring. This company has secured water for mill and power purposes. The three or four feet of snow temporarily prevents machinery going in or the ore on the dumps being shipped. But there is talk in camp of sending some of the richest ore out on pack animals soon.

When the snow disappears considerable ore will be hauled out by wagon. The Twin Falls branch, some hundred miles distant, is the closest railroad point. Wells and Elko on the Southern Pacific railroad are about 150 miles from Jarbridge.

The principal companies now doing active work in the camp are the Bourne, Escalon, Stephens and Grumvatts and Turo and Pablock. All of these people have rich properties, with considerable rich ore awaiting shipment. No great depth has yet been attained, but the quantity of rich gold ore found near the surface and the general formation of the country, principally lime and quartzite, convince all practical mining men who have been in Jarbridge that its ores are not only rich but extensive, giving the camp permanency. All the men in there now, and there are a

Jarbridge for the early spring of 1910 Jarbridge for the early spring of 1910 is a sure comer.

Buys and Stewart secured a group of six good claims at Jarbridge, and they expect to take up two or three leases as soon as they can break into the camp in this spring.

STOCKS CONTINUE WEAK. Transactions Are Slow for Week on Local Exchange.

Transactions Are Slow for Week on Local Exchange.

But little change was noted on the local mining exchange this morning and stocks continued weak. There was little effort to buy or sell Coloradol Beck Tunnel showed some activity and was disposed of at 14½ cents. Columbus Consolidated worked up some activity with the price moving upward. The stock sold at \$1.10 and as high as \$1.15. During the regular board session 2,200 shares of the stock were disposed of.

Lower Mammoth was sold today at 51 and 50 cents. Grand Central remained unchanged and was not active. Iron Blossom was only able to reach 73 cents on a slow market.

Sloux Consolidated was about the strongest stock on the board today and the prices demanded by the stock were 32, 31 1-3 and 31 cents. Utah Consolidated brought 5 cents for 5,500 shares.

The total sales for the week amounted to 513,834 shares and the amount paid for the stock was \$159,985.70.

The number of shares sold today was 42,300 and the amount paid out for the stock was \$11,137.25.

On the curb market there was fair activity and the sales made were 200 shares of Open at 50 cents; 100 shares of Ely Witch at 25 cents and 1,000 shares of Federal Ely at 15 cents.

BUY OLD TECOMA MINE.

Salt Lake and Idaho People Take Over

Old Producer.

A deal has just been closed whereby
Salt Lake and Idaho people take over
the controlling interest in the old Tecoma Mines company, which owns a
valuable property in the Tecoma min-

valuable property in the Tecoma mining district about 110 miles west of Ogden. The mine has produced in the neighborhood of \$1,000,000 and has been worked for the past 30 years. The control of the property was held by A. A. Moule of Tecoma, Nevada, and the law ifm of Stephens & Smith of Salt Lake. The deal was made by the Thomas G. Clegg & Co. brokerage house. Frank B. Stephens remains with the company and is one of the directors.

with the company and is one of the directors.

The following persons from Blackfoot, Idaho, have become interested in the property: President John S. Booker, J. H. Merrill, Leon Misslen, and John Dean. The Salt Lake people are General Manager Lamar Nelson and Thomas G. Clegg. With the acquiring of control the persons interested practically control all the country adjacent to the Salt Lake Copper company owned by the Lewissohn brothers of New York. The persons who have just purchased an interest in the Tecoma mines are the controlling interests in the Mineral Mountain, Iron Mask and Little Butte properties in the district.

trict.

The purchase was made on the recommendation of W. H. Harmon, an engineer from Leadville, who will remain in charge of the property as mine

WILL START WORK IN SPRING. Utah Con. of Tintic Closes Up Mine For the Winter.

For the Winter.

At a meeting of the board of directors of the Utah Consolidated Mining & Milling company Tuesday, S. S. Jones of Provo was chosen president and Heber Cutier of Salt Lake vice president, and they with T. R. Cutler, Reed Smoot, J. C. Cutler and J. O. Carter form the board of directors. Hart J. Fitzgerald remains secretary and treasurer.

It was decided to forego further work on the mine for a while. This action was necessitated by the freezing up of the pipes and the difficulty of access to the mine during the winter months. Mr. Jones was authorized to engage some competent person as care-taker to look after the machinery and other equipment. This action was not taken on account of lack of funds as there is a neat little sum in the treasury to enable the company to start action in the spring.

The change in the presidency of the company was made at the request of Mr. Cutler, the stress of other business preventing him from attending to the work as he wished to.

ANNUAL REPORT ON TREASURE HILL MINE

mpany Issues Statement Showing Work Done Since Property Was Taken by Present Owners,

(Special to The News.)
Provo, Jan. 15.—The officials of the
Jintah Treasure Hill Coalition Mining company have just issued the annual report of the company following the annual meeting of Tuesday. The report shows the progress of the com-

report shows the progress of the company since it was taken over by the present management. The following was the report on the stock.

Stock represented, 568,395 shares; stock not represented, 429,355 shares; outstanding stock, 997,750 shares; treasury stock, 2,250 shares; capitalization, 1,090,000 shares.

The treasurer's report for the year ending Dec. 31, 1909 was as follows:

RECEIPTS.

DISBURSEMENTS.

Wages \$16,224.25 General expenses 8,787.68 Claims patented (pur-chased from govern-ment) 854.00 Taxes 186.51 Accounts payable Jan.
1, 1910 3,668.91

There are in the treasury 2,250 shares of stock purchased for assessment No. 1, at a cost of \$51,50. The subsequent assessments amount to \$87.22 on the 2,250 shares.

The manager's report from Oct. 1, 1907 to Dec. 31, 1909, is as follows:

"The first work done on the property since the organization of the company was commenced Oct. 1, 1907, and consisted of cleaning up the old workings, surveying unpatented claims, and making other improvements necessary to prepare the property for active de-

lings, surveying unpatented claims, and making other improvements necessary to prepare the property for active development.

"Work was suspended Dec. 22, 1907, and the property remained idle until May 4, 1908, when the shaft was unwatered to the 600 foot level. The installation of a new boiler, air compressor and pipe line was completed and the air drills placed in commission, Sept. 24, 1908. Previous to this time, hand drills were used and progress was naturally slow. Assessment work on five unpatented claims was done in 1908, aside from mine development.

MINE DEVELOPMENT.

MINE DEVELOPMENT.

"The footage driven previous to Oct. 1, 1907 is as follows:

"Tunnel level,1,000 feet; shaft, 600 feet; 100-level drifts, 400 feet; 250-level drifts, 473 feet; 250-level cross cuts, 35 feet. 600-level drifts, 550 feet; total 3,058 feet.

"The following footage was made from Oct. 1, 1907 to Dec. 31, 1909:

"On 260-foot level, drifts, 671 feet; cross cuts, 85 feet; raise, 60 feet; winze, 15 feet.

"On 600-foot level, drifts, 1,293 feet; total footage in property, 6,177 feet."

The old board, consisting of the following persons, was unanimously elected to serve for another year: Jesse Knight, president; John Dern, vice president; J. William Knight, general manager; E. S. Fisher, W. Lester Mangum. The board again chose R. E. Allen secretary and treasurer.

STOP WORK ON PLANT. Cold Weather Delays Operations at

Gold Weather Delays Operations at Gold Spring Property.

Severe weather has suspended operations on the power plant now being erected by the Gold Spring Mining and Power company, which the company expected to have running this month. The last of the poles are about to be set and the stringing of wires completed, which will connect the mine and mill with the power plant 17 miles away. Late word from there is that the "juice" will be turned in some time next month.

The Jenney property is now working a force of about 25 men, the present operations being in the development line principally, crosscutting on the 300-foot level, where they are looking for results shortly.

The 100-ton mill at Fay, Nev, has not been working regularly of late, owing to the freezing up of pipes, but the change in the weather will remedy these unfavorable conditions. There are probably 25 miners employed in the camp today.

The Deer Lodge district is working a few men, mostly on assessments. But the country generally presents a favorable aspect, with indications pointing to things stirring in the early spring, said W. H. Perry, who came in from there today.

ORE LAUNCH FOR LAKE.

ORE LAUNCH FOR LAKE.

Talk of Putting on Boat for Promontory Point Production.

Several companies interested in the Promontory point district on Great Salt Lake are preparing for a big campalign of development early in the spring. More work has been done there during the past year than most people know of and this year the companies promise even greater things. Among the things that will probably be done this year is the installation of a freight launch on the lake to carry ore from the mines to the smelter at Garfield. At present it is declared there is enough ore to justify the use of a launch and it would also afford a very cheap means of transportation. By the use of the launch there is practically no wagon haul at either end. This would afford the companies the cheapest means of transportation of any district in the state.

On the Promontory Signal Peak property there is a tunnel some 500 feet in length. It goes through a lime and prophyry formation, opening up a fine lot of iron ore. After this had been done the men were put to work further up the hill at the junction of two surface outcroppings. Here at a little depth an iron capping was encountered that carries values in copper and gold.

In the spring a 500 foot tunnel will be run from the tunnel, catching the contact at a depth of something like 1,000 feet. This it is believed will prove up the mine.

The Lakeside Copper company has been following a thin streak of very rich copper ore, running 50 per cent metal, This appears to be going directiy into the mountain and great depth is being attained in the tunnel. The

CONCENTRATES.

Manager George H. Dern of the onsolidated Mercur returned from amp today.

D. C. Jackling is expected to return om a trip to Arizona and New Mexi-next week.

co next week.

T. L. Nelson of Park City leaves this evening for New York in the intorest of the Utland Copper company, a new corporation which is to develop the copper deposits along the Green river.

George W. Lambourne, general manager of the Daly Judge Mining company at Park City has gone east on a business trip. It is understood that it has considerable to do with the building of the big Snake Creek tunnel, which will develop the western end of the Park City district.

Word was received yesterday from

Word was received yesterday from the Virginia Gold Mining company in the Osceola mining district in Newada that a ledge has been cut in the lower tunnel that pans gold freely. Dr. H. A. Whitney, manager of the property, says he has no doubt but what the property will soon have a good tonage of milling ore.

age of milling ore.

E. Storer, a loan agent, is said to be leading the opposition forces that are after Tony Jacobson and his management of the South Columbus Mining company. A special meeting will be held Jan. 22, to change the date of the annual meeting from February to June so that visiting stockholders may visit the property while here to attend the meeting.

The Ely Resurrection Mining com-

the meeting.

The Ely Resurrection Mining company owning some of the most promising ground in the Robinson mining district at Ely has just placed an order for a Star drill, having a capacity of 2,500 feet. The drill will probably be delivered at the property the last of February and work will begin at once. It is declared that as soon as the snow is off the ground the company will begin surveying the claims that still remain unpatented.

A recent arrival from Jarbridge, the

main unpatented.

A recent arrival from Jarbridge, the latest Nevada gold camp, declares that the Escolon property there has been sold to a syndicate of Twin Falls people in which Kimball, Winters, and others are interested. The price paid is said to have been \$250,000. At present the people are going into Jarbridge at the rate of 50 to 60 a day and already the camp boasts of a population of 300 persons. A corporation is being formed by Salt Lake and Ogden people to take over the Bunker Hill property at Jarbridge. This is one of the big properties there and it is said that some of the richest values thus far found exist in the Bunker Hill claims.

Tests made on Iron Canyon and

Bunker Hill claims.

Tests made on Iron Canyon and Golden Bee mines ores by the students at the University of Utah show that cyaniding is the proper method to care for the ores. This applies to the entire Bannock district. The ores were submitted by Jesse Fox, manager of the properties and the classes under Dr. Robert H. Bradford made the experiments with the amalgamation process only 52 per cent of the values are secured. With a 3 per cent cyanide of potassium solution, extraction of 92 to 94 per cent was obtained. In addition to this 70 per cent of the silver values were obtained by a weak solution of cyanide combined with lead saits. The tests developed the fact that even better results could be obtained by the use of a cyaniding plant than by send-

TRADE CONDITIONS CONTINUE NORMAL

New York, Jan. 14.-R. G. Dun & row will say

in the season's business, general conditions are normal and the volume of trade as measured by bank exchanges and raliroad earnings is heavy. There is a wide diversity of reports from the different trades and trade centers, but even the least satisfactory indicates no fundamental weakness, while a majority of the reports, particularly those farthest removed from the influence of the unsettled conditions in the financial markets, show a healthy condition of affairs.

An increased demand for pig iron is indicated, and prices show a hardening tendency in some districts. Inquiry is broadening cuite generally, with sales of from 40,000 to 50,000 tons of various grades noted at the west, while business in some parts of the east shows an appreciable expansion, mostly in malleable iron.

Trade in cotton goods was restricted n the season's business, general con-

an appreciable expansion, mostly in malleable iron.

Trade in cotton goods was restricted to some extent by unsettled conditions in the raw material market, although in the face of a sharp docline in the staple there were large sales of print cloths at the advanced price of 4½ cents for delivery during the first six months of the year. There was also a shortening of discounts on printed goods of a staple character, foreshadowing to some buyers an advance from the base price of 6½ cents.

Much more activity is noted in hides, some large tanners entering the market. Prices were lower than have previously ruled, but the declines were not great, considering that most packers who sold were enabled to clean out their stocks of branded varieties up to the first of the year.

SPECULATORS LIQUIDATED

Moral Pressure Exercised in Rock Island Discipline Case Had Strong Effect.

ARE WATCHING WASHINGTON.

Steel and Union Pacific Were Freely Sold Today-Close Active And Strong.

New York, Jan. 15.—There was heavy liquidation of speculative holdings of stocks throughout the week. The moral pressure exercised in connection with the discipline administered for the Rock Island manipulation on Dec. 27 was be-lieved to have forced the retirement of some important speculative commit-

some important speculative commitments.

Beyond this a profit-taking movement was supposed to have been planned for the opening weeks of the new year to take advantage of casing money markets and the general public demand for stocks which it was hoped would be stimulated. The demand proved insufficient to absorb the Hauldard insufficient to absorb the Hauldard insufficient to absorb the Hauldard insufficient to absorb the take the money are to recessitate the retrenchment of outlay for speculation. The course of events at Washington keeps allive consideration of relations between the national government and corporations.

The most noteworthy feature of the opening of the stock market today was the sale of 7,000 shares of United States Steel at 34%, as against yesterday's closing price of 85. Business was in fairly large volume and further extensive declines were registered, especially in American Smelting, which sold off 1%, Central Leather, Westinghouse Electric and United States Rubber I and International Harvester 2. The rest of the list moved in sympathy with the active issues.

Opening prices were the lowest made in the important stock, the market thereafter going up briskly on pakery buying for stocks made overlight gains of a point, and the list in general ruled fractionally above yesterday's closing. Reading, Southern Pacific, Northern Pacific, Pennsylvania, Delaware & Hudson, Atchison & Wabash preferred rose I. Westinghouse Electric broke 4%, but recovered half of its loss.

The market closed active and strong, selling was resumed which was particularly effective in Union Pacific and United States Steel, the latter breaking to 84%. When prices had been driven down to about the low figures current at the opening, supporting orders were distributed and the decline was checked. Prices then started upward with a rush to the top level of the day. St. Paul, Southern Pacific, Analgamated Copper and Reading soid 2 points over other stocks a point or more.
